**DRIVING NEXT GENERATION APPLICATIONS** 

# **SINAMICS** Variable frequency drives

siemens.com/sinamics

### Into the digital and sustainable future – driving next generation applications

How can you make production more efficient? Accelerate your digital transformation? And become more sustainable?

The answer is our SINAMICS variable frequency drives. They are energy efficient, offer the versatility you need for any application, and drive your digital transformation by providing the data to continuously improve production efficiency and sustainability. Our drives offer you integrated safety and security features, efficient engineering and software tools as well as comprehensive lifecycle services. In other words: Everything you need to address the next generation of applications – today and tomorrow.

An overview of the technical data	46 – 47

### The SINAMICS family for all power & performance classes

Always the optimum version for every application, power rating and requirement: The wide range of SINAMICS drives has the precise solution you require for your application.

Scan this code for more information about SINAMICS variable frequency drives family

4

### EFFIC

Implement energy-efficient applications easily, quickly, and safely with efficient motion control.

- Sustainable Drive Systems
- Efficient Motion Control solutions
- Drive System Services

### VERSATLE

Drives equipped with tailored safety features to ensure optimal machine safety in a wide range of industrial applications.

- Safety and Security Integrated
- Drive applications
- Drives for any industry

### FUTURE-PR SOF

Efficient engineering, powerful software tools, and cloud and edge connectivity for greater transparency.

- Digitalization in drive technology
- Efficient drive engineering
- Drive Software for all applications

## **SINAMICS –** the perfect fit for any industry

Food & beverage

With SINAMICS drives we provide the food and beverage industry with drive solutions that allow them to meet individual customer requirements quickly, flexibly and with the highest quality. The drives also ensure that all processes are energy efficient and reliable.

#### Chemicals

Applications in the chemical industry demand rugged, reliable and safe equipment, and of course this also applies to the drives. The SINAMICS family offers extensive safety functions and a high degree of protection, which makes it the ideal fit for harsh environments.

#### Pharma

The pharmaceutical industry evolves at a rapid pace and it requires drive systems that can keep up. Thanks to their modular design, SINAMICS drives can be easily adapted to address requirements. Their high energy efficiency also gives users that allimportant competitive edge.

#### HVAC

With their industry-specific integrated software features e.g. for fan applications in HVAC systems / building automation SINAMICS drives are the perfect fit for these domains.

Oil & Gas / Hydrogen

High levels of efficiency and safety are crucial in the oil & gas and hydrogen industries SINAMICS variable frequency drives fully comply with both requirements. Security Integrated ensures system availability and Safety Integrated functions keep people and machines safe.

**Automotive & Battery** 

The shift to e-mobility is fundamentally changing the automotive industry. By using a SINAMICS digital twin battery manufacturers and machine builders can speed up their time to market and satisfy the massively growing demand. We offer solutions to meet current and future challenges in motion control. Thanks to comprehensive features and an innovative design, the SINAMICS family can be deployed in any industry, for example:

#### Cranes

Cranes play an important role in many industries where the fast and precise handling of large and heavy goods is mandatory to enable optimal throughput and logistics. SINAMICS drive technology addresses each and every crane tasks.

#### Water & Waste Water

Requirements in the areas of drinking water, waste water, and desalination vary widely. This is where the SINAMICS family comes into its own offering a selection of perfectly tailored solutions that ensure maximum efficiency and sustainability.

#### Intralogistics

Increasing inventory turnover rates, small order quantities with fast delivery times and the increasing need to save energy and drive sustainability. We can help you master all these challenges with reliable SINAMICS drive technology.

#### Marine

Driven by a strict decarbonization agenda, the disruptive trend of Green Shipping is shaping the future of the industry in an unprecedented way. SINAMICS drives and the consequential capture, analysis and evaluation of the wealth of data available in operation open up new dimensions regarding reliability and energy efficiency and in turn, environmentally-compatible operation.

#### **Pulp & Paper**

The pulp & paper industry is facing an evolving market, strict climate goals, and new energy challenges. This means that plants must be smarter, more sustainable and more efficient than ever before. SINAMICS drives have the functions and performance to futureproof your business.

#### Metals

The global metals industry is undergoing radical transformation primarily driven by the urgent need to decarbonize the various processes. This increases operational efficiency and production flexibility to adapt to changing market dynamics. SINAMICS drives represent the perfect fit for all applications in the metals domain, complemented by a digitalization portfolio and is your ideal and dependable partner to create a smart, efficient & sustainable production environment.

8

### Variable frequency drives **for every drive application**

#### Pumping/ventilating/compressing

SINAMICS supports the continuous and energy-efficient operation of pumps, fans and compressors – that either run continuously or require a high dynamic performance. The advantages include especially flow control, short response times – and the avoidance of damaging vibration levels and cavitation.

> SINAMICS V20
 > SINAMICS G130 / G150
 > SINAMICS G180
 > SINAMICS G120X
 > SINAMICS G220
 > SINAMICS DCM

#### Moving

Energy-efficient and rugged solutions for basic conveyor technology involving roller or chain conveyors, hoisting gear and elevators. Additionally, these solutions address the needs of storage and retrieval machines that demand a high dynamic performance. And always with Safety Integrated onboard.

> SINAMICS G120C
> SINAMICS G130/G150
> SINAMICS G220
> SINAMICS S150
> SINAMICS DCM
> SINAMICS G115D
> SINAMICS G120D
> SINAMICS S120
> SINAMICS S200
> SINAMICS S210
> SINAMICS DCP

Depending on the actual power rating and functionality, the following drives are available, for example:

- **> STANDARD PERFORMANCE CONVERTERS**
- ↗ INDUSTRY SPECIFIC CONVERTERS
- **> HIGH PERFORMANCE CONVERTERS**
- DISTRIBUTED CONVERTERS
- **→ SERVO CONVERTERS**

↗ DC-DC CONVERTER

#### Positioning

When high dynamic performance and precision are demanded: SINAMICS ensures that individual axes are precisely positioned and allows several axes to be interpolated in a coordinated fashion – for example, as required in complex robotic or handling applications.

> SINAMICS G120
> SINAMICS G220
> SINAMICS G120D
> SINAMICS S120
> SINAMICS S200
> SINAMICS S210
> SINAMICS DCP

#### Processing

SINAMICS is the ideal solution for continuous processes demanding high speed and torque precision, for instance, for extruders, centrifuges, agitators and all types of production machines. With isochronous communication and Safety Integrated they are predestined to address high-end motion control applications.

> SINAMICS G120
> SINAMICS G150
> SINAMICS G220
> SINAMICS S150
> SINAMICS DCM
> SINAMICS V90
> SINAMICS S120
> SINAMICS S200
> SINAMICS S210

#### Machining

Whether high-speed spindles or feed and auxiliary axes for turning, milling, drilling and sawing: SINAMICS is the perfect drive for all machining applications. Fast adaptability and minimum equipping times play a decisive role when it comes to achieving high levels of productivity.

#### ↗ SINAMICS S120

### **Efficient drive systems –** Go for sustainability

Electric drive systems consume 70% of the overall energy used in industry – therefore representing an enormous energy saving potential. You can optimize your processes and enter into a new dimension of efficiency with the latest drive systems and digital drive train solutions.

The best way to really optimize your drive systems effectively: with a holistic, consequentially digital strategy. Together, we can draw-up the optimum solution for your plant or system. We can support you with the latest drive technology which complies with the standards of today and tomorrow. The energy efficiency features of our SINAMICS drives unlock further energy saving potential. With digital solutions, we transform the data from your drives into a truly valuable resource – which with Predictive Maintenance Services, significantly boosts productivity and efficiency. With Siemens as partner, you secure the know-how that you require to increase the productivity of your drives -

combining higher energy efficiency and productivity and at the same time saving valuable resources. Now is the time to take action. With SINAMICS drives, the possibilities are endless.

Go for drive system optimization! The key to improving drive efficiency is to optimize the entire system. Highly specialized motors and drives, intelligent sensors and analytic tools allow you to optimally harmonize and coordinate your processes and drive systems. Further, with a digital twin of your drive system, you can optimize your maintenance and energy management – slashing your energy consumption by up to 60 percent and making your operations more sustainable.

Scan this code for more information about efficient drive systems

Next Generation The next generation of SINAMICS variable frequency drives supports a sustainable future in every phase of its lifecycle. Design, engineering and operational phases supported by space-saving design, efficient engineering tools, digital twin and energy-saving functions. SINAMICS drives with flexible hardware and software solutions are the key elements of an efficient drive system. For example with the Clean Power technology version of SINAMICS G220, the integrated Active Infeed Unit keeps harmonics to a minimum (THDi < 5%). This also reduces energy losses in the system.

### Motion beyond expectations

Drives move the industries. But how can they make them more efficient, more reliable and more sustainable – and exceed all expectations while they are doing it? Our answer: Siemens Xcelerator for Digital Drivetrain.

#### Digital solutions for Drivetrain Design and Drivetrain Health

Combine the real and the digital worlds to reach the next level of efficiency and sustainability in your drivetrain value chain: with suitable digital solutions for drivetrain design and drivetrain health.

#### **Drivetrain Design:**

Simplify and shorten the engineering steps to get faster and more efficiently from concept to the commissioned drivetrain.

#### **Drivetrain Health:**

Reduce total cost of ownership for your equipment and machine park – energy, maintenance, downtime.

### Digitalization along the drivetrain value chain

#### Dimension

Accurate in motion: Dimension your motors, gearboxes, and complete drivetrains digitally with greater precision – for greater reliability and energy efficiency.

#### Simulate

Faster in motion: Add the Digital Twin of the drivetrain to your machine simulation to speed up your design and engineering phases and to accelerate your time to market!

#### Connect

Data in motion: Acquire high-quality raw data and connect your entire drivetrains or machines to cloud or on-premise platforms – for a consistent and secure data flow.

#### Optimize

Better in motion: Analyze and visualize drivetrain and machine data in digital solutions and apps to identify optimization potentials and concrete actionable measures how to tap it.

#### Highlights

- Drive technology as entry point into digitalization
- Transparency along the complete drive train
- Virtualization, engineering tools, connectivity and analytics
- Cloud and Edge solutions
- Identification and implementation of optimization measures
- Development of new business and service models

Real Digital Twin of the the next generation of SINAMICS drives is available in DriveSim Engineer with functional and logical parts of the real firmware for even easier simulation of the drive response in engineering and commissioning phases before hardware is available.

Scan this code for more information about Siemens Xcelerator for Digital Drivetrain

### **SINAMICS Drive Software** The right function for every application

The SINAMICS Drive Software ensures that our SINAMICS variable frequency drives operate smoothly and reliably. It offers comprehensive functionality, is easily expandable and enables the greatest possible flexibility for a wide range of applications.

#### **Easily expandable**

The SINAMICS Software package comes with functionality to address many applications. However, the scope of performance can be further expanded using additional SINAMICS Drive Software options. These options allow the use of special added value or expansion functions.

#### **Greatest flexibility**

SINAMICS Drive Software options can be easily ordered together with SINAMICS drives. Additionally, SINAMICS Drive Software options can be tested free of charge for a limited period and then purchased later.

#### **Comprehensive functionality**

**SINAMICS Drive Software** enables highly accurate and dynamic control of different types of motors, and it offers functions for the following:

- Digitalization
- Safety Integrated
- Security Integrated
- Motor control
- Technology
- Energy efficiency
- Efficient engineering
- Application specific features

The next generation of SINAMICS variable frequency drives offers an integrated web-server with innovated functions for easy engineering and supporting data exchange with Startdrive. No additional devices or separate software is required.

Scan this code for more information about SINAMICS Drive Software

# **Efficient engineering** over the complete lifecycle

#### **Selection tools:**

Our **<u>SINAMICS Selector App</u>** guides you to the right converter.

<u>Siemens Product Configurator (SPC)</u> helps you configure your drive and mechanical system.

<u>**TIA Selection Tool (TST)**</u> for simple drive engineering. Starting from your application, the tool supports you step-by-step when defining the mechanical system and when selecting and dimensioning drives, motors and gearboxes. In addition to engineering results such as characteristics, technical data, installation drawings and dimension drawings, SIZER for Siemens Drives also calculates the performance and the load-dependent energy usage.

#### Simulation and virtualization with the Digital Twin

Add the Digital Twin of the drivetrain to your machine simulation – speed up your design and engineering phase, while improving machine quality and robustness! DriveSim Designer and DriveSim Engineer are the ultimate solutions for designing, commissioning and optimizing your drive train system.

#### **Commissioning tools:**

The <u>**TIA Portal**</u> includes SINAMICS Startdrive to intuitively integrate SINAMICS drives into automation landscapes. Perfect interaction between SINAMICS drives and SIMATIC controllers: The same operating concept, reduction of interfaces and the high level of user-friendliness make it possible to quickly integrate SINAMICS converters into the automation landscape and commission them using the TIA Portal.

The *integrated webserver* – simplicity revisited The webserver enables easy commissioning, operation and diagnostics, all of which are aligned to the actual drive functionality, with no additional software required. The parameter masks are already integrated in the drive. The device is directly accessed using the web browser with the web address of the device, for instance from a laptop.

Scan this code for more information about the engineering tools

### **Safety Integrated –** simply safe, twice as efficient

#### Highlights

- Certified system solution in compliance with the applicable standards
- Lower system costs due to fewer components and lower wiring costs
- Faster commissioning/ maintenance
- Higher productivity through shorter downtimes

With Safety Integrated in SINAMICS drives, you are not only selecting a safe technical solution, but you also benefit from perfect support relating to all safety issues. This starts with the seamless integration of safety technology in efficient motion control systems. This certified system offers valuable support in the workflow, such as engineering in the TIA Portal.

With the safety acceptance test integrated in the TIA-Portal/Startdrive, you can now validate the correct safety parameterization –and the safety activation test supports you when it comes to validating complete safety control circuits – extending from the sensor to the actuator. Safety Integrated allows you to eliminate electromechanical components. For you, this means that you require less space in your control cabinet, and you can reduce your costs when it comes to stocking spare parts and maintenance. Further, there is no wear as shutdown is realized purely electronically. Even when safety functions respond, the drive remains connected to the line supply – and can still be fully diagnosed.

Customized safety concepts with Safety Integrated can be very easily implemented based on the safetyrelated communications via PROFIsafe. You benefit from higher productivity with minimized downtimes.

The next generation of SINAMICS drives is part of one Safety Integrated software platform with a common look and feel and functional response. The Safety Integrated functions in our drives are now certified according IEC 61800-5-SIL 3 and ISO 13849-1 Cat. 4 and PL e.

Scan this code for more information about safety integrated

### **Security Integrated –** heightened data security for industrial plants and systems

With the new Security Integrated functions we are hardening SINAMICS drives and therefore also your machines against external cyber attacks.

#### Highlight

• Keep systems and data safe with Security Integrated

Scan this code for more information about industrial cybersecurity

### **Efficient Motion Control –** Time for other perspectives!

Industry is demanding more and more complex motion control solutions and robots. To meet these demands, machine builders must compensate the shortage of skilled workers, become more flexible in the face of increasing complexity, and ensure the safety of operators and machines. But how? With solutions for efficient motion control. Turn challenges into success!

#### Benefit from efficient motion control in automation

Increase your flexibility in motion control projects with modular, standardized, and user-friendly engineering and operation.

Accelerate the time to market of your machines through parallelization and virtualization of work routines.

#### SUSTAINABILITY

Test and validate applications in a virtual environment without hardware or physical prototypes.

### SIFETY

Ensure maximum machine and operator safety while maintaining productivity and flexibility.

Faster time to market, increasing functionality and complexity, and demands for safety and sustainability are major challenges for machine builders. Efficient motion control helps you build innovative machines faster and without costly prototyping, so you can more easily meet your customers' needs.

Scan this code for more information about Efficient Motion Control and ways to make motion control more efficient.

### **Cutting edge services –** to continuously improve your production environment

#### Highlights

- Increase efficiency: Increase the overall efficiency of your plant, become more resource-efficient and sustainable, and improve quality with our service portfolio.
- Reduce costs: Our services help you minimize unplanned downtime, better plan service intervals, and cut overall maintenance costs.
- Increase availability: Digital services make fault analysis easier and speed up troubleshooting, which helps you increase the availability of your plant.
- Save energy: Increased production efficiency allows you to save energy, reduce CO<sub>2</sub> emissions, and boost overall plant sustainability.
- Gain flexibility: Use our services to make your plant production systems and processes more flexible and open to new technologies.
- Reduce time to market: Speed up your products' time to market with increased availability and fewer plant shutdowns.

Scan this code for more information about drive system services

#### **Digital Enterprise Services**

Our services cover the complete lifecycle of the SINAMICS product family. We support you in achieving more efficient production, leveraging the opportunities provided by digitalization and at the same time reducing the total cost of ownership.

You benefit from spare part and repair services specific to your plant or system, as well as global support provided by our experienced service experts. This support is available locally, remotely, online, by telephone or through individual training courses.

With both traditional and digital service portfolios for motion control, we support you in your digital transformation journey while also addressing your strategic targets such as environmentally friendly production, resource efficiency and much more.

#### **Optimized service contracts**

With an individual service contract, you can ensure that every component of your SINAMICS drive solution is checked, maintained and overhauled at precisely the right point in time. And, of course, replaced if necessary.

In addition, we can now offer customized maintenance packages, configured to optimally address your SINAMICS drive requirements through the **Siemens Industry Mall**.

#### **Retrofit for Drive Systems**

The latest SINAMICS technology is the perfect replacement for discontinued SIMOVERT MASTERDRIVES and MICROMASTER drives. We recommend replacing aging products. With Retrofit for Drives Systems you secure the availability of spare parts and critical product know-how, thus avoiding plant downtimes. This results in increased availability and total efficiency of the machines in your plant. Digital Enterprise Services is ready to support you in your migration strategy and plan your retrofit projects.

#### **Service Protect**

We offer a 6 month free-of-charge extended warranty for SINAMICS drives.

Furthermore, you have the option of warranty cover your SINAMICS drive for up to seven and a half years, therefore guaranteeing continuous availability over the complete product lifecycle.

For more information and to find the Service Protect options available for your product, go to <u>Service Protect</u>

Service Protect can also be added to your order using the Siemens Product Configurator SPC

3AC 500 690 V	7.5 200 kW, compact device; 250 6600 kW, cabinet unit	
Energy recovery	No	
Control modes	V/f (linear, square law)	
	Vector control with and without encoder (SLVC) Field-oriented control (FOC) with encoder and certification for explosion protection	
Ambient temperature	0 to 40 °C	
Line filter	Compact devices: with integrated line filter for environments according to IEC 61800-3 Category C2/C1 (optional)	
	Cabinet units: with integrated line filter for environments according to IEC 61800-3 Category C3	
	Compact devices, cabinet units for IT line systems: with integrated line filter for environments according to IEC 61800-3 Category C4	
Braking chopper	Yes	
Safety functions	STO, ATEX-certified PTC thermistor input for explosion- protected motors	
Communications	PROFIBUS DP, EtherNet/IP, Modbus TCP/IP, Modbus RTU, CANopen: PROFINET	
TIA Portal connected	No	
Commissioning tools	IMS	
Controllers	SIMATIC ET200/SIMATIC S7-1500, SIMATIC PCS 7	
Recommended motors	Innomotics GP/SD <sup>1</sup> (standard induction motors aluminum/cast iron)	
	Innomotics TN <sup>1</sup> (trans-standard motors)	
	Innomotics XP <sup>1</sup> (explosion-protected motors)	
	<sup>1</sup> Please find the right from our product partner Innomotics.com	

Built-in unit (compact) Cabinet unit, Cabinet Systems

Scan this code for more information about SINAMICS G180

# **SINAMICS G120X**

Flexible. Combinable. Application specific.

Format	Built-in unit (compact)	
Drive concept	AC/AC	
Degree of protection	IP20, UL open type, IP21 (roof top kit)	
Supply voltage/ power kW (hp)		
3AC 200 240 V	0.75 55 kW / 1 75 hp	
3AC 380 480 V	0.75 560 kW / 1 700 hp	
3AC 500 690 V	3 630 kW / 4 700 hp	
Energy recovery	No	
Control modes	V/f (linear, square law, FCC, ECO), sensorless vector control (SLVC)	
Ambient temperature	–20 °C to 45 °C (60 °C with derating) <sup>1)</sup>	
Line filter	According to IEC 61800-3, with integrated line filter for environ- ments Category C3/C2; optional C1 with external filter B	
Braking chopper	No	
Safety functions	STO SIL3 HW via terminals	
Communications	PROFINET, PROFIBUS, EtherNet / IP, Modbus RTU, USS, BACnet MS / TP, Wi-Fi via SINAMICS G120 Smart Access Module, SD card for parameter cloning	
TIA Portal connected	via GSD file	
Commissioning tools	BOP-2, IOP-2, G120 Smart Access Module, SIMATIC PCS7 and SIMATIC PDM	
Digitalization tools	Drivetrain Analyzer Edge, DriveSim Designer, TIA Selection Tool, SPC, TIA Portal Add-in(with GSD file), Drive Connector SINAMICS, Drive System Services	
Controllers	SIMATIC S7-1500/1200/400, Desigo PX	
Recommended	Innomotics <sup>2</sup> Reluctance motors	
motors	Innomotics GP/SD <sup>2</sup> (standard induction motors with aluminum/cast iron enclosures)	
	Innomotics DP <sup>2</sup> (smoke extraction motors)	
	1 The maximum temperature for Profinet convertors is FE %	

#### Highlights

- The infrastructure drive for pump/fan applications in water/waste-water industries and building automation
- Seamless range of power ratings available in
   9 frame sizes extending from 0.75 – 630 kW
- Simple selection and ordering using just one order number – and immediately ready to run
- Impressively efficient with specific industry and energy efficiency functions

#### Applications

Pumping/ Ventilating/ Compressing

<sup>1</sup>The maximum temperature for Profinet converters is 55 °C

<sup>2</sup> Please find the right motors from our product partner Innomotics.com

Scan this code for more information about

SINAMICS G120X

# **SINAMICS G220**

Efficient. Secure. Future proof.

#### Highlights

- Efficient energy consumption with Clean Power technology (THDi < 5%) and optimal high-efficiency motor control.
- Efficient engineering via an integrated web server and Startdrive (TIA Portal).
- Secure technology with Safety and Security integrated functions, S2 redundancy, 3C3 coating, and IP55 / UL Type 12.

#### Applications

Pumping/ Ventilating/ Compressing

Processing Positioning

	SINAMICS G220 IP20	SINAMICS G220 IP55
Format	Built in Unit (compact)

# SINAMICS S200/ S200 Basic

Performance optimized. Easy to use. Fit for future.

Format	Built-in unit (compact)	
Drive concept	AC/AC	
Degree of protection	Drives: IP20	
	Motors: IP54/IP65	
Supply voltage/ power kW (hp)		
1/3AC 200 240 V	0.1 1.0 kW (0.14 1.34 hp)	
3AC 380 480 V	0.2 ~ 7.0 kW (0.279.4 hp) <sup>1</sup>	
Energy recovery	-	
Control modes	Servo control with encoder	
Ambient temperature	0 to 40 °C without derating	
	40 ~ 60 °C with derating	
Line filter	With external line filter for environments according to IEC 61800-3 Category C2	
Braking chopper	S200: all have an integrated braking resistor (>0.1 kW)	
	S200 Basic: integrated braking resistor (>0.4 kW)	
Safety functions	STO, SS1-t via terminal (Certified according IEC 61800-5- up to SIL 3 and ISO 13849-1 Kat. 4 and PL e) <sup>1</sup>	
Security functions	User Management & Access Control (UMAC, Integrity and authenticity check)	
Communications	Pulse train interface, Modbus RTU, PROFINET	
TIA Portal connected	Full integration	
Commissioning tools	Webserver / SINAMICS Startdrive	
Digitalization tools	DriveSim Designer, TIA Selection Tool, SPC	
	TIA Portal/ SINAMICS Startdrive, SINAMICS Webserver, SIOS App	
Controllers	SIMATIC S7-1200, SIMATIC S7-1500/T, ET200 SP Open controller	
Sustainable concept	Environmental product declaration (EPD) provides transparency of the product environmental footprint for SINAMICS S200 in its entire lifecycle. For details please refer to following link <u>EPD SINAMICS S200</u>	
	SIEMENS EcoTech Profile (SEP)	
Recommended motors	Motors for Motion Control, SIMOTICS S-1FL2	

### Highlights

- Optimized dynamic performance enabled by fast system response and high overload capacity
- Reduced space requirement thanks to compact design
- Easy engineering using Webserver, Startdrive

### Applications

Next Generation

<sup>1</sup> Not available for S200 Basic

Scan this code for more information about SINAMICS S200

## **SINAMICS S210**

Versatile. Precise. Safety Integrated.

### Highlights

- Easy installation with One Cable Connection (OCC) and easy comissioning with One Button Tuning
- Basic and Extended Safety Integrated functionality via PROFIsafe
- SIMOTICS S-1FK2, S-1FT2 and S-1FS-2 motors for increased performance

### Applications

Processing Positioning

Format	Built-in unit (compact)		
Drive concept	AC/AC		
Degree of protection	IP20		
Supply voltage/ power kW (hp)			
1AC 200 240 V	0.1 0.75 kW (0.14 1.02 hp)		
3AC 200 480 V	0.4 7 kW (0.54 9.5 hp)		
Energy recovery	No, but DC coupling optional for 3AC devices		
Control modes	Servo control with encoder, 2nd encoder possible <sup>1</sup>		
Ambient temperature	0 °C to 50 °C (32 °F to 122 °F)		
Line filter	1AC devices with integrated line filter for environments according to IEC 61800-3 Category 2 and Category C3 3AC devices with integrated line filter for environments according to IEC 61800-3 Category C3, Category C2 and longer cable lengths with optional, external line filter		
Braking chopper	Integrated braking resistor, external resistors optional		
Safety functions	Safety: SIL3 certified according IEC 61800-5 and PLe/Cat.4 according ISO 13849-1 for the new SINAMICS S210 (V.6).

**SINAMICS S120M** 

### SINAMICS S200. Servo on! Move beyond.

## **SINAMICS DC-DC converters** Optimal performance for industrial applications

**⊅ DC-DC CONVERTER** 

# The compact DC-DC converter SINAMICS DCP.

# **SINAMICS DCP**

Reliable. Combinable. Versatile.

Format	Built-in unit	
Drive concept	DC – DC	
Degree of protection	IP20: SINAMICS DCP 30 kW	
	IP00: SINAMICS DCP 120 kW and DCP 250 kW	
Operating voltage	0 – 1000 V DC (DCP 30 kW and DCP 120 kW)	
range side 1	0 – 1220 V DC (DCP 250 kW)	
Operating voltage	0 – 1000 V DC (DCP 30 kW and DCP 120 kW)	
range side 2	0 – 1220 V DC (DCP 250 kW)	ŀ
Rated current	DCP 30 kW: 50 A at 600 V DC (40 hp)	•
	DCP 120 kW: 200 A at 600 V DC (161 hp)	•
	DCP 250 kW: 250 A at 1000 V DC (335 hp)	
Input capacitance	DCP 30 kW: 40 µF (on both sides)	
	DCP 120 kW: 1200 µF (on both sides)	
	DCP 250 kW: 800 µF (on both sides)	4
Inductance of the	DCP 30 kW: 700 μH	
energy storage	DCP 120 kW: 500 μH	
	DCP 250 kW: 500 μH	
DC electronics	24 V	N
power supply	DCP 30 kW: current consumption: 5 A at 24 V	
	DCP 120 kW: current consumption: 20 A at 24 V	
	DCP 250 kW: current consumption: 20 A at 24 V	
Maximum power loss	5800 W DCP 250 kW	
	2800 W DCP 120 kW	
	800 W DCP 30 kW	
Fans	DCP 120 kW / 250 kW: temperature controlled	
Control modes	Voltage control, current control	
Ambient operating temperature	0 °C to +40 °C (up to +55 °C with derating)	
Communications	PROFINET, PROFIBUS DP, EtherNet/IP, Modbus TCP	
TIA Portal connected	Yes	
Commissioning tools	BOP, Starter	
Controllers	iontrollers Internal	
controllers		

### Highlights

- Ready-to-go equipment
- Attaching storage system to S120 drive train system

Fit the future

### Applications

Positioning

Scan this code for more information about SINAMICS DCP

### SINAMICS family – an overview

	Supply voltage	Power (kW)	Power (hp)
